Skewer

The motor shown is a  
DCM-189 in a -2S EPS  
box. A 7x5E APC prop  
works well on 2s packs.

Dihedral break is slit up to 1" from the ends, on the bottom.  
The center is propped up 1", and the gap is glued. The glue  
joint is taped over when cured. Hot glue, PU, or epoxy should  
work fine.
